Dear Teacher,

October is fire safety month, but this fun craftivity is perfect for any time you are discussing fire safety with your students!

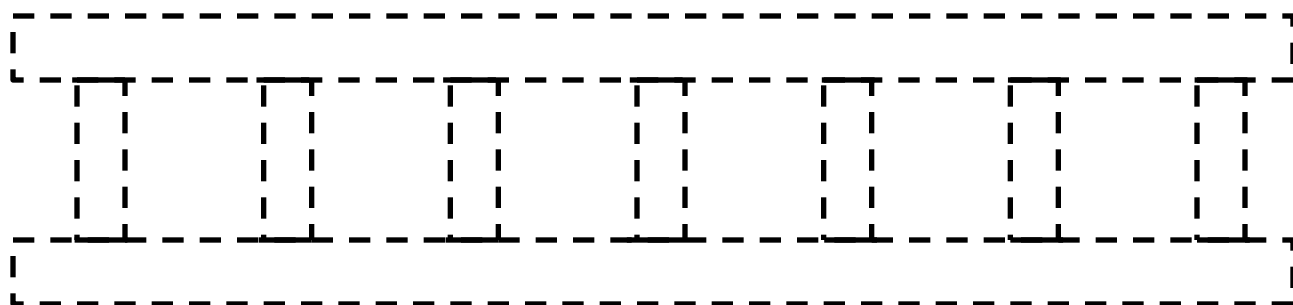

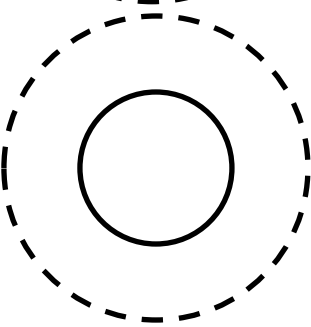

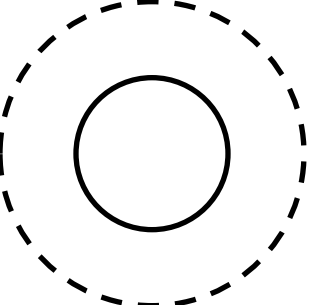

This one page craft is fun and easy to create. Students write or draw how they can practice fire safety in the box on the truck. Then, they color the parts and then cut on the dotted lines. Next, students glue together the fire truck and then tape or staple the "I can practice fire safety" flap on the rectangle. That's it!

There are 4 versions. I with the ladder together for students who would struggle with cutting out the inside portions, and another where students cut out the ladder rungs and then glue the other side on. Both versions come unlined and lined as well.

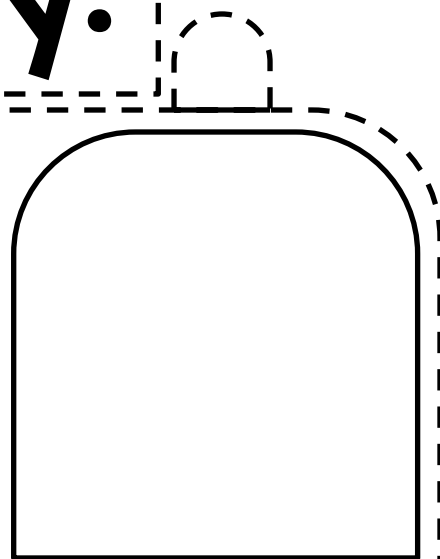

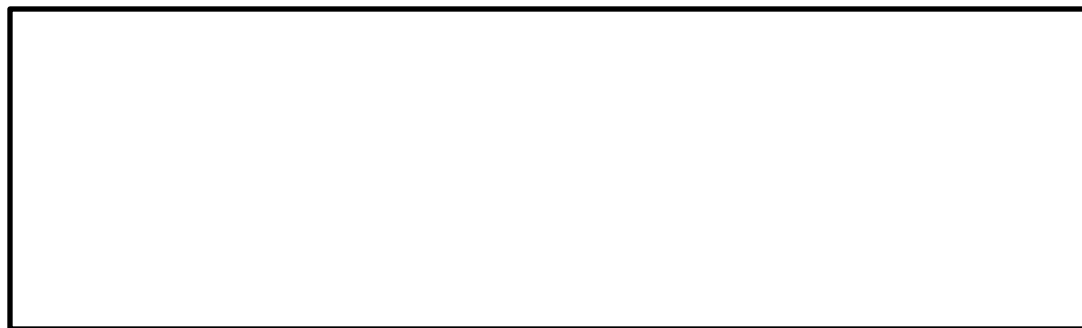

I love to see your students' work, so please email pictures of the completed craftivity to primaryparadisetpt@gmail.com if you don't mind me sharing them on social media.

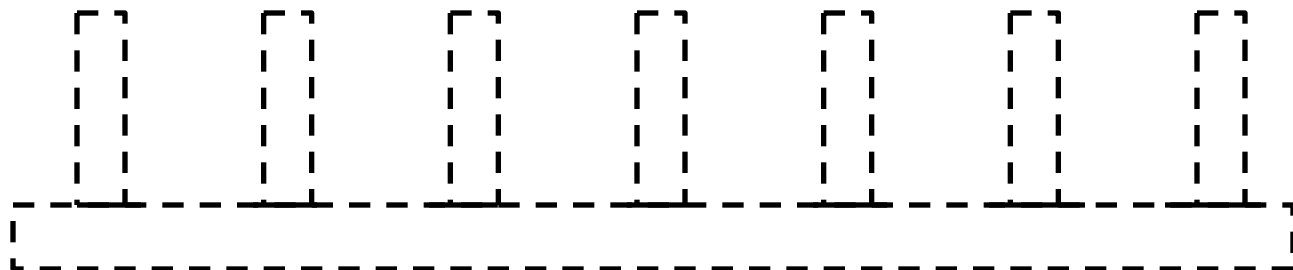

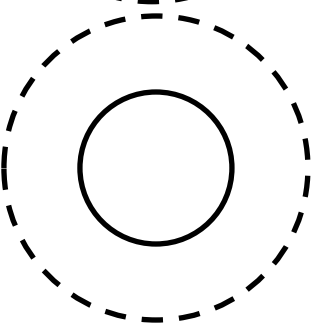

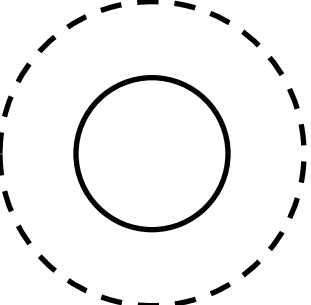

Thank you and enjoy!
Martha
